Tomato Factory News

The tomato factory will operate again this year. A number of farmers who live near by find it advantageous to plant both tobacco and tomatoes. Last year both crops were fairly a failure. There is one good feature about tomatoes and that is the farmer knows before he plants it what he is going to get for it. This should be true about tobacco. Tobacco however, may be high one day and low the next. It may be \$30 one year and \$10 the next. The wise farmer will not put all his money in one crop nor all his eggs in one basket.

Not only so, but raising tomatoes will help business and give a number of people good employment. Of course the tomato season is well as the tobacco crop were almost failures in some places, and no one should not judge by last year's crop. A farmer near here has 200 bushels of tomatoes on one acre of land and a good year, on good land 300 to 400 bushels is not an unusual yield. The price for tomatoes will be announced February 1st, but farmers may depend on a better price than last year and get ready to plant the land. As there was so much trouble last year in seed coming up, the factory will not furnish seed this year. The management advises that the farmers plant seeds or there be one planting with one early variety and one late variety so that both plants and canner may not be rushed in disposing of the crop. Prompt payment as usual will be made Sept. 1 and Oct. 15. Seed can be secured from any good dealer.

Are You For Law and Order?

Are You 100 per cent American?

If so, you will give to the great nation-wide campaign now under way in Virginia to raise funds to combat anarchy and Americanism foreign residents.

Uncle Sam's agents who are enforcing prohibition laws have endorsed this campaign and called on the people of the United States to support it.

Attorney General Palmer, Ex President Taft, the Congress of the United States, in fact all thinking people have recognized the necessity for an organized effort to Americanize foreigners in combating the insidious progress of Bolshevism and Communism.

The appeal for funds is being made in your community, today. The drive for Virginia's quota of \$750,000 is drawing to a close. Can you fail to heed this appeal to your patriotism?

United States Gold Coins.
 The first American gold coins of eagles, half-eagles and quarter-eagles of the value of \$10, \$5 and \$2.50, respectively, were placed in circulation 120 years ago. One and three dollar gold pieces were formerly coined, but they were discontinued in 1850. The first coin called an eagle was used in Ireland in the thirteenth century, and was so called from the figure of an eagle impressed upon it, but it was made of base metal. The standard of the eagle was borne by the ancient Persians, and the Romans also carried gold and silver eagles as emblems, and sometimes represented them with a thunderbolt in their talons. Charlemagne adopted the double eagle as the standard of the Holy Roman Empire. The eagle was the standard of Napoleon I and Napoleon III, as well as of Austria, Prussia and Russia.
